Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over McGivern (3,333,593) in view of Aylott (3,504,682). McGivern '593 discloses an eyelid enhancement kit comprising: a package having a first compartment; a first tray (insert 21) received in the first compartment and having a first recess and a second recess (grooves 14) respectively defined in a top face of the first tray and a cover (12) covering the first tray; a first eyelid mask and a second eyelid mask (false eyelashes 15) sandwiched between the first tray and the cover and respectively received in the first recess and the second recess of the first tray; wherein the cover has a first protruding (protuberance 24) area formed on a bottom face of the cover to correspond to the first recess and a second protruding area (protuberance 24) formed on the bottom face of

Art Unit: 3728

the cover to correspond to the second recess so that the first protruding area and the second protruding area are able to be respectively received in the first recess and the second recess to securely sandwich the first eyelid mask and the second eyelid mask. See Figures 1-4 embodiments. McGivern '593 does not appear to disclose a second compartment with a second tray and recess for holding a brush and cutouts for the recesses. Official notice is taken that it is old and conventional to provide additional compartments with trays to kits to provide for additional storage space. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made in view of the official notice to provide an additional compartment with additional tray with recess for holding additional items in the kit of McGivern '593, since it has been held that mere duplication and rearranging of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. V. Bemis Co.*, 193 USPQ 8 and *In re Japikse*, 86 USPQ 70.

Aylott '682 discloses that it is desirable to provide a brush with eyelid masks for cleaning and use with the eyelid masks. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide an brush to the modified kit of McGivern '593 as taught by Aylott '682 to be used with the eyelid masks.

With respect to claim 2, official notice is taken that it is old and conventional to provide cutouts for recesses in a tray for easier removal of items held therein.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made in view of the official notice to provide cutouts for the recesses in the tray of McGivern '593 for easier removal of the items being held therein.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over the above references as applied to claim 1-3 above, and further in view of Hirzel (5,176,754).

McGivern '593 as modified above discloses all the limitations of the claims except for the brush having a rubber cap formed on a distal end of the eyelid brush. Hirzel '754 discloses that it is desirable to have apparatus for applying cosmetics with double applicator means such as a brush and a rubber cap to have multiple functions.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the brush of McGivern '593 with double applicator such as brush and a rubber cap as taught by Hirzel '754 for multiple applications.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are eyelid enhancement kits analogous to applicant's instant invention.
